In the memo header include the dates this trip report covers.
thanks

Subject: Westlake trip report (Draft)

Dan, attached is my Westlake trip report. Please make corrections / changes as you see fit, then we can discuss it before sending it to Cecilia. FEI completed about 90% of the work. They just need to build the decon pad, clear up some of the "finger" pathways and general clearing. The GCPT is scheduled for Tuesday, 11/12, in the afternoon. MDNR is also scheduled to be there as well.

Dan, Eric Nold & Chuck Hooper should be there on Tuesday. FEI stated that there would be no issues with getting them site trained that afternoon. Also, there were no issues with the media or general public that I am aware of for this time period. If you have questions/concern, please let me know.
